EXERCISE-2

MANIPULATING DATA

</div>

OBJECTIVE

After, the completion of this exercise the students will be able to do the following
● Describe each DML statement
● Insert rows into tables
● Update rows into table
● Delete rows from table
● Control Transactions

A DML statement is executed when you:
● Add new rows to a table
● Modify existing rows
● Removing existing rows
A transaction consists of a collection of DML statements that form a logical unit of work.

To Add a New Row

INSERT Statement

Syntax
        INSERT INTO table_name VALUES (column1 values, column2 values, …, columnn values);

Example:
INSERT INTO department (70, 'Public relations', 100,1700);

Inserting rows with null values
Implicit Method: (Omit the column)

        INSERT INTO department VALUES (30,'purchasing');

Explicit Method: (Specify NULL keyword)

INSERT INTO department VALUES (100,'finance', NULL, NULL);

Inserting Special Values

Example:

Using SYSDATE

INSERT INTO employees VALUES (113,'louis', 'popp', 'lpopp','5151244567',**SYSDATE**, 'ac_account', 6900, NULL, 205, 100);

Inserting Specific Date Values

Example:

INSERT INTO employees VALUES (114,'den', 'raphealy', 'drapheal', '5151274561',
TO_DATE('feb 3,1999','mon, dd ,yyyy'), 'ac_account', 11000,100,30);

To Insert Multiple Rows

& is the placeholder for the variable value
Example:

INSERT INTO department VALUES (&dept_id, &dept_name, &location);
Copying Rows from another table

➤   Using Subquery

Example:

INSER INTO sales_reps(id, name, salary, commission_pct)
                SELECt employee_id, Last_name, salary, commission_pct
FROM employees
WHERE jod_id LIKE '%REP');
CHANGING DATA IN A TABLE

UPDATE Statement
Syntax1: (to update specific rows**)**

UPDATE table_name SET column=value WHERE condition;

Syntax 2: (To updae all rows)

UPDATE table_name SET column=value;

Updating columns with a subquery

UPDATE employees
SET job_id= (SELECT job_id
FROM employees
WHERE employee_id=205)
WHERE employee_id=114;

REMOVING A ROW FROM A TABLE

 DELETE STATEMENT

Syntax

DELETE FROM table_name WHERE conditions;

Example:
        DELETE FROM department WHERE dept_name='finance'';

Find the Solution for the following:

1.   Create MY_EMPLOYEE table with the following structure

NAME	NULL?	TYPE
ID	Not null	Number(4)
Last_name		Varchar(25)
First_name		Varchar(25)
Userid		Varchar(25)
Salary		Number(9,2)

2.   Add the first and second rows data to MY_EMPLOYEE table from the following sample data.

ID	Last_name	First_name	Userid	salary
1	Patel	Ralph	rpatel	895
2	Dancs	Betty	bdancs	860
3	Biri	Ben	bbiri	1100
4	Newman	Chad	Cnewman	750
5	Ropebur	Audrey	aropebur	1550

3.   Display the table with values.

Select * from MY_EMPLOYEE

ID	LAST_NAME	FIRST_NAME	USERID	SALARY
1	Patel	Ralph	rpatel	895
2	Dancs	Betty	bdancs	860
3	Biri	Ben	bbiri	1100
4	Newman	Chad	Cnewman	750
5	Ropebur	Audrey	aropebur	1550

5 rows returned in 0.00 seconds   Download

4.   Populate the next two rows of data from the sample data. Concatenate the first letter of the first_name with the first seven characters of the last_name to produce Userid.

```
INSERT INTO MY_EMPLOYEE
VALUES
   (6,'Jason','Chadwick','cjason', 350),
   (7,'Dan','Kishore','kdan',950) ;
```

```
1 row(s) inserted.

0.01 seconds
```

```
1 row(s) inserted.

0.00 seconds
```

5.   Make the data additions permanent.

```
Commit statement not applicable. All statements are automatically committed.
```

commit;

6.   Change the last name of employee 3 to Drexler.

```
update MY_EMPLOYEE
SET last_name='Drexler'
Where ID=3;
```

```
1 row(s) updated.

0.00 seconds
```

7.   Change the salary to 1000 for all the employees with a salary less than 900.

```
update MY_EMPLOYEE
SET salary=1000
Where salary<900;
```

```
4 row(s) updated.

0.01 seconds
```

8.   Delete Betty dancs from MY _EMPLOYEE table.

```
DELETE from MY_EMPLOYEE
where first_name='Betty'
AND last_name='Dancs';
```

```
1 row(s) deleted.

0.03 seconds
```

9.   Empty the fourth row of the emp table.

```
DELETE FROM MY_EMPLOYEE
where id = ( SELECT ID FROM MY_EMPLOYEE
        ORDER BY ID
        offset 3 rows
        fetch next 1 rows only)
```

```
1 row(s) deleted.

0.02 seconds
```
